The Director of Central Intelligence

Washington, D.C 20505

Critical Intelligence Problems Committee

14 January 1985

MEMORANDUM FOR: Members, Critical Intelligence Problems Committee

VIA: Eloise R. Page
ChairmanFROM: [REDACTED]
Executive Secretary

SUBJECT: CIPC Monthly Report--December 1984 (U)

1. The Committee did not convene in December. The next monthly meeting will be scheduled in February 1985. [REDACTED]

[REDACTED]

2. DCI Terrorism Analyst Network (FLASHBOARD): The FLASHBOARD network continues to grow in size. During December two new terminals were installed in the White House/EOB compound: one in the Crisis Management Facility and a second in LTC Ollie North's office in the Old Executive Office Building. A third is slated to be installed in the President's Emergency Operation Center in February. This brings the number of subscribers to 12: CIA, DIA, NSA, State/INR, Army, Navy, Air Force, Marines, FBI, JSOC, Secret Service, and now the White House Compound. [REDACTED]

[REDACTED]

3. These additions change the character of the network. Previously it was restricted to analyst-to-analyst dialogue. However, with a terminal now in the White House compound, the potential exists for FLASHBOARD to perform as a crisis management network. [REDACTED]

5. Narcotics Intelligence Activities: The follow-up report for the DDCI has been sent to the CIPC members for their review and concurrence by 11 January. This report is a record of the progress made to date on interagency coordination and narcotics intelligence collection and analysis. [REDACTED]

25X1

6. Combat Intelligence Analysis: The working group met three times during the month in an effort to review thoroughly the current and projected activities within the DOD to support the intelligence needs of theater commanders. A DOD working paper has been developed which has proved helpful in our effort to determine what levels of review and coordination are in place. Both the DIA and NSA representatives will be presenting papers addressing the various aspects of the SIGINT and Imagery tactical intelligence support architecture. At present, the working group has identified the need to:

- Examine the "war scenario" methodology used by both SIGINT and Imagery in support of theater commanders; and
- To bring program managers, who have to verify national intelligence requirements, into the planning process as soon as possible. [REDACTED]
